

METAL STRIPS

**FUNCTIONAL SPECIAL ALLOYS FOR
DEMANDING APPLICATIONS**

**Auerhammer
Metallwerk**
Wickeder Group

www.auerhammer.com

Metal strips made of special alloys are always used when there are special requirements.

Materials:

- › FeNi alloys: defined soft magnetic properties or adapted thermal expansion
- › NiCr, NiCrFe and NiMoCr alloys: heat and corrosion resistance
- › NiCu alloys: low magnetic permeability and excellent corrosion resistance
- › Nickel: good electrical conductivity and corrosion resistance
- › Welding filler materials: chemical composition adapted to the welding process
- › CuNi alloys: high chemical resistance, adjusted electrical resistance

PORTFOLIO WICKEDER GROUP

- › Clad Materials › Bimetals › Nickel Strips › Metal Foils
- › Photochemical Etching › Sheet Metal Working › Waterjet Cutting
- › Electroforming › Parylene Coating › Materials Engineering etc.
